School for Indigenous Bribri Indians in Alto Katsi, Talamanca Costa Rica

Every Child Deserves a Decent School!

Imagine an entire indigenous community.
Imagine the children in that community wanting to go to school, but not having more than
a shack with one standing wall!

Imagine people wanting to build their own school, but just not having any money!
This is a tough reality and hard to imagine, but it's happening in the mountains of the
Bribri indigenous territory in Costa Rica.

In Costa Rica the Indigenous territory of Talamanca covers the largest remaining natural forest in Central America. It is the home of five Indian tribes.

In 1983 the Talamanca Mountains and their Indian reserves were designated a Biosphere Reserve under the UNESCO Man & Biosphere Programme.

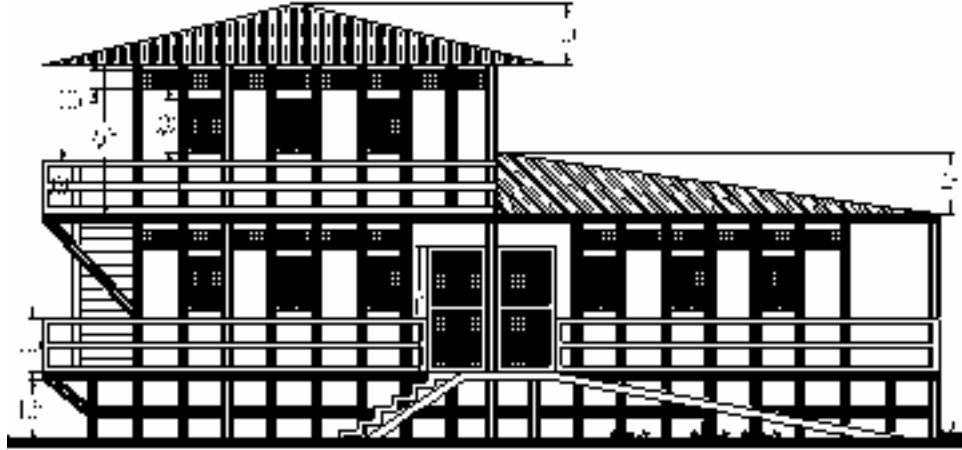

The people from Alto Katsi, a community with about 30 families and 23 children in school used to work in the plantain fields in the area.

The local school teacher Lorena has to walk every day for 2 hours to the village of Alto Katsi.

Your donation is needed so they can build a new indigenous school two classrooms, an eating area, a bathroom, and if at all possible with locally produced energy, a computer connected to the world!

Edificio principal propuesto

Proposed school building.

Please support this rewarding project for the children of the Bribri community in Alto Katsi.

They deserve the education to build a future in a sustainable environment and preserve their rich culture going back long before Christopher Columbus came to Costa Rica on September 18, 1502.
